Commercial Craft Brewery Anaheim, CA

Rooftop Fixed-Tilt & Carport Solar 385,000 kWh Annual Production 270 kW System Capacity

30% - 40% Energy Offset

## **CASE STUDY**

COMMERCIAL SOLAR INSTALLATION, AN IMPORTANT RENEWABLE ENERGY SOURCE FOR THIS CRAFT BREWERY.

Golden Road Brewing, a craft brewery in Anaheim, California, utilizes a commercial solar installation to significantly reduce energy costs. One of many California Businesses lowering energy costs and raising net income.

Historically California businesses have experienced the highest electricity rate growth in the country. In recent years many California businesses have seen their rates more than double.

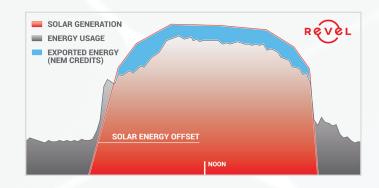

1990 - 2020 Historical CA C&I Energy Rates

Golden Road wanted to take control of the electricity cost with commercial solar so they teamed up with Revel Energy to design a custom commercial solar system for their Anaheim facility.

Revel's project managers got started, working with Anaheim city and Orange County authorities and code enforcement to collect the necessary certifications. Revel installed a 141 kW rooftop fixed-tilt solar system paired with a 129 kW carport structure combining to 270 kW system capacity. Consisting of 750 solar panels, the separate locations are combined to one system to optimize available space. The system is expected to produce 385,000 kWh of energy annually.

Taking advantage of multiple benefits and programs like the Solar Investment Tax Credit (ITC) and Net Energy Metering (NEM), Golden Road's new system also offsets some of their electricity use by earning credits for overproduction during the day that pays for use at night when the system isn't producing.

Golden Road Brewing looks toward a bright future with a smaller carbon footprint and much lower energy costs.

Revel Energy's team of commercial and agricultural solar specialists offer turnkey solutions for California businesses to lower their electricity costs ultimately increasing cash flow.
