COMMERCIAL SOLAR INSTALLATION, AN IMPORTANT RENEWABLE ENERGY SOURCE FOR THIS SPECIALTY GASKET MANUFACTURER.

West Coast Gasket Co., a specialty gasket manufacturer in Brea, California, utilizes a commercial solar installation and energy storage to reduce energy costs by approximately 85%. One of many California Businesses lowering energy costs and raising net income.

Historically California businesses have experienced the highest electricity rate growth in the country. In recent years many California businesses have seen their rates more than double.

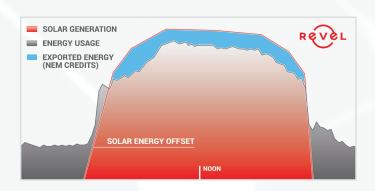

1990 - 2020 Historical CA C&I Energy Rates

West Coast wanted to take control of the electricity cost with commercial solar so they teamed up with Revel Energy to design a custom commercial solar system for their Irvine facility.

Revel's project managers got started, working with Brea city and Orange County authorities and code enforcement to collect the necessary certifications. Revel installed a 207.4 kW rooftop fixed-tilt solar system consisting of 680 solar panels. The system is expected to produce 315,010 kWh of energy annually.

Taking advantage of multiple benefits and programs like the Solar Investment Tax Credit (ITC) and Net Energy Metering (NEM), West Coast's new system also offsets 85% of their electricity use by earning credits for overproduction during the day that pays for use at night when the system isn't producing.

West Coast Gasket Co., looks toward a bright future with a smaller carbon footprint and much lower energy costs.

Revel Energy's team of commercial and agricultural solar specialists offer turnkey solutions for California businesses to lower their electricity costs ultimately increasing cash flow.
