ROOFTOP COMMERCIAL SOLAR PROJECT CASE STUDY

THIS ROOFTOP COMMERCIAL SOLAR INSTALLATION IS A SUSTAINABLE ROOFTOP ENERGY SOURCE FOR THIS LOS ANGELES WAREHOUSE FACILITY.

Bordan Shoe Company, a premier reseller of branded athletic footwear located in Los Angeles, has equipped their rooftop with commercial solar modules to drastically reduce their electricity bills.

Owning and operating their own 400,000 square foot full-service warehouse, Bordan provides customers unparalleled access to top brands and product availability in quantities suited to the size of any business.

California has seen some of the highest electricity rate growth in the country, Bordan also started to incur higher electricity bills. Many businesses have seen their rates more than double - with utilities citing a variety of reasons that rates will continue to climb.

Bordan wanted to take control of their electricity costs by outfitting their rooftop with commercial solar, tasking Revel Energy to design a custom energy solution. Working with the Los Angeles Department of Water and Power, county authorities and code enforcement along the way to receive all necessary certifications for interconnection and permission to operate.

Revel's skilled engineering team and project managers designed and constructed a 302 kilowatt roof-mounted system that uses 765 commercial solar panels, 387 optimizers and 3 SolarEdge inverters to offset 90% of the building's typical energy demand.

The system is estimated to produce about **\$4.5 million dollars in electricity savings** over its 30-year lifespan, increasing the building value by \$1.1 million dollars.

Taking advantage of incentives and programs like the new IRA-enhanced solar investment tax credit, net energy metering, state and federal bonus depreciation, this rooftop solar solution quickly pays for itself.

Bordan Shoe Company furthers their commitment to their manufacturers and clients both, with this bold decision to look toward a sustainable future for their business with commercial solar.

Revel Energy's team of commercial and agricultural solar specialists offer turnkey solutions for California businesses to drastically lower their electricity costs to increase total cash flow.
